MEMORANDUM FOR: General Earle G. Wheeler
Chairman, Joint Chiefs of Staff
Department of Defense

25X1

SUBJECT : Transport of Military Equipment into
North Vietnam

In view of the considerable attention given the question of how military equipment has been reaching North Vietnam, I believe you will find of interest the attached memorandum on the subject prepared by some of my people here. The memorandum cites reasons for believing that surface-to-air missile equipment and other recently received military equipment in North Vietnam arrived by rail.
